Understand autism, the person and what to do. Visit www.autism.org.uk/TMI

I'm not naughty. I'm autistic. For autistic people like me, the world can be a terrifying place. Sometimes sounds feel like my head is exploding. Clothes feel like my skin is burning. And when a tiny thing changes, it feels like my world is ending.

Can you make it to the end?

Sensory Overload (Interacting with Autism Project)

Vidéo de 2mn20s (2012)

Some people with autism have difficulty processing intense, multiple sensory experiences at once. This animation gives the viewer a glimpse into sensory overload, and how often our sensory experiences intertwine in everyday life.

Created as part of Mark Jonathan Harris' and Marhsa Kinder's "Interacting with Autism." Coming in January 1st 2013, IWA is a three-year transmedia project funded by the federal Agency for Health Research and Quality (AHRQ). University Professor Marsha Kinder, the Executive Director of the Labyrinth Project at USC, and Mark Harris are heading a team of filmmakers and artists working to build an interactive, video intensive website that will focus on the best available treatments for autism.
